

Personalized UMA Roster & Management Fees

Separately Managed Accounts (SMAs) provide investors access to professional money management and the ability to customize portfolios to their needs and investment objectives. The Personalized UMA program provides access to SMAs with the flexibility to own a single portfolio or combine multiple portfolios into one comprehensive, customized account backed by research from Global Manager Research.

Global Manager Research is a division of the Wells Fargo Investment Institute which evaluates, recommends, and monitors investment managers and their products on qualities such as experience, performance, management capabilities, and investment philosophy.

Global Portfolio Management (GPM) provides a full range of investable portfolio solutions that combine asset allocation guidance and product research with best practices in portfolio and risk management. The portfolios range from low-minimum solutions to ultra-high-net-worth solutions combining exchange-traded funds (ETFs), mutual funds (MFs), separate accounts, alternative investment strategies, customized services, and individual stock positions. While the solutions vary by investor segment and risk/return objectives, the process remains centered on both the conceptual and practical elements of successful portfolio management.

Since no one manager / investment program is appropriate for all types of investors, this information is provided for informational purposes only. We need to review your investment objectives, risk tolerance, and liquidity needs before we introduce appropriate managers / investment programs to you. Please be sure to consult your Financial Advisor regarding the process of selecting managers you may wish to consider for the management of your account(s).

The following Wells Fargo Investment Institute Global Manager Research Rating list is as of **July 2025** and subject to change.

Important Disclosures:

1 Wells Fargo & Company ("Wells Fargo") holds a limited ownership interest in Allspring Global Investments ("Allspring"), a trade name used to describe the asset management businesses of Allspring Global Investments Holdings, LLC. Wells Fargo receives compensation from Allspring for the distribution, administrative, research, and operational services that they provide.

2 This portfolio is NOT available to Trust accounts custodied at Wells Fargo & Company that wish to use the Personalized UMA program.

*This strategy invests in mutual funds proprietary to the Manager. If the manager is terminated and no longer part of the Program, these mutual funds must be liquidated upon termination of the Manager's services. This may cause you to incur tax consequences. The shares are not eligible to be transferred, are not available for Non-Resident investors, and cannot be sold for tax harvesting gain/loss requests.

(m) Trading Authority: Investment managers available through this program are defined as either Discretionary Managers or Model Managers. Model Managers are noted by (m) at the end of the product name. Unless otherwise identified by the (m) indicator, the manager will operate as a Discretionary Manager. Discretionary Managers are responsible for the day-to-day investment management of client assets. Conversely, Model Managers provide their investment strategy to Wells Fargo Advisors, who will implement the strategy and handle the day-to-day investment management of client assets.

(d) Long Duration: Strategies that invest primarily in long-term bonds will decline in value, perhaps significantly, when interest rates rise.

The Core Style: The philosophy behind a core investment style is to have no bias towards growth or value, only the quality of the position. Typically a core portfolio searches to buy shares in companies that an investment manager believes would perform well in all market environments. As a result, they tend to contain a mixture of both growth and value shares.

The Value Style: A simple way to describe value investing is an approach to buy companies that offer the best value for the money. Value managers look to companies with prices that are believed to be undervalued relative to the market. Undiscovered companies or stocks that have price movements that do not correspond to the company's long-term fundamentals are generally considered to be value investments. The value style of investing cannot guarantee appreciation in the market value of the portfolio's holdings. The return and principal value of stocks fluctuate with changes in market conditions. The value type of investing tends to shift in and out of favor.

The Growth Style: Investment managers who chose to implement a growth style search for companies that are growing their earnings at a rapid pace. The companies are expected to grow faster than the stock market average. A growth investor tends to aim for big gains over the long term and must be willing to withstand the ups and downs of the growth-oriented market. Growth stocks may be more volatile than other stocks. The growth style of investing cannot guarantee appreciation in the market value of the portfolio's holdings. The return and principal value of stocks fluctuate with changes in market conditions. The growth type of investing tends to shift in and out of favor.

The prices of **mid-cap and small-cap stocks** are generally more volatile than large-cap stocks. They often involve higher risks because smaller companies may lack the management expertise, financial resources, product diversification, and competitive strengths to endure adverse economic conditions.

Global and international investing in foreign securities presents certain risks not associated with domestic investments, such as currency fluctuations, political instability, uncertain economic conditions, and different accounting standards. This may result in greater share price volatility. These risks are heightened in emerging markets.

Investing in **fixed income securities** involves certain risks such as market risk if sold prior to maturity and credit risk especially if investing in high yield bonds, which have lower ratings and are subject to greater volatility. All fixed income investments may be worth less than original cost upon redemption or maturity. Bond prices fluctuate inversely to changes in interest rates. Therefore, a general rise in interest rates can result in the decline of the value of your investment. Bond laddering does not assure a profit or protect against loss in a declining market.

Income from **municipal securities** is generally free from federal taxes and state taxes for residents of the issuing state. While the interest income is tax-free, capital gains, if any, will be subject to taxes. Income for some investors may be subject to the federal Alternative Minimum Tax (AMT).

There are special risks associated with investing in **preferred securities**. Preferred securities generally offer no voting rights with respect to the issuer. Preferred securities are generally subordinated to bonds or other debt instruments in an issuer's capital structure, subjecting them to a greater risk of non-payment than more senior securities. In addition, the issue may be callable which may negatively impact the return of the security. Preferred dividends are not guaranteed and are subject to deferral or elimination.

Investors should not place undue reliance on yield as a factor to be considered in selecting a fixed income investment. Dividends are not guaranteed and are subject to change or elimination.

Convertible securities are subject to the same interest rate, price, and credit risks as regular debt securities. Prices tend to be inversely affected by changes in interest rates. In addition, a convertible security is also subject to the risks associated with common stocks. The return and principal value of stocks fluctuate with changes in market condition.

There are special risks associated with an investment in **real estate**, including credit risk, interest rate fluctuation, and the impact of varied economic conditions.

Master Limited Partnerships (MLPs) are not appropriate for all investors and are particularly not usually appropriate for retirement-related accounts such as ERISA and IRA accounts. Investors in these accounts should also consider the potential for unrelated business taxable income (UBTI) before investing in MLPs. Also, an MLP shareholder, i.e., a limited partner unitholder, receives a K-1 instead of a 1099. An investment in MLP units involves certain risks which differ from an investment in the securities of a corporation. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, a change in the current tax law regarding MLPs could result in the MLP being treated as a corporation for federal income tax purposes which would reduce the amount of cash flows distributed by the MLP.

Exchange Traded Funds (ETFs) and Closed-End Funds (CEFs) are subject to risks similar to those of stocks. Investment returns may fluctuate and are subject to market volatility, so that investor's shares, when redeemed or sold, may be worth more or less than their original cost.

Wells Fargo Investment Institute Research Fee Disclosure Strategies managed by Allspring Global Investments, LLC ("Allspring Global Investments") in its role as either a Discretionary Manager or Model Manager will not be available in ERISA and IRA accounts that WFA manages with Investment Selection Discretion. In addition, certain strategies managed by Allspring Funds Management (Managed DSIP, Managed DSIP II, ESG Managed DSIP, Current Equity Income, and Income Multi Asset Portfolio (collectively, the "Equity Income Strategies") will not be available in any taxable accounts that WFA manages with Investment Selection Discretion. As a result, such Client accounts will not have the ability to participate in certain investment opportunities, which could lead to lower returns for such Clients. Clients should consider this limitation when evaluating whether to grant WFA with Investment Selection Discretion.

WFII charges Allspring research access fees for investment research services that WFII provides to Allspring. Allspring manages the Equity Income Strategies utilizing information derived, in part, from certain of the research services. The research access fees are calculated based on the assets invested in the strategies, meaning that WFII earns more money when more assets are invested in the strategies. The research access fees are assessed at rates that result in WFII receiving fees that are equivalent to substantially all of the Manager fees assessed in conjunction with the Income Multi Asset Portfolio, the Current Equity Income Strategy, and the Managed DSIP strategy, and approximately half or greater of the Manager fees assessed for the Managed DSIP II strategy and the ESG Managed DSIP strategy.

The fee paid to WFII is for research services WFII provides to Allspring, including: (i) investment research that WFII provides to Allspring; and (ii) access to certain WFII research analyst teams, strategists, and associates to discuss the research and/or obtain additional research commentary on covered names, insights into sectors, etc. (collectively "Research Services"). While WFII does not provide the Research Services to other third-party Managers for utilization in managing strategies, WFII does provide the Research Services to its affiliates, WFCS and WFAFN, who in turn, may utilize the Research Services to manage strategies and who provide the investment research at no cost to WFCS and WFAFN advisory clients, WFCS and WFAFN brokerage customers, and prospective clients and customers for their individual use. As such, investors in the Equity Income Strategies are indirectly paying for investment research that others receive at no cost, and that those same investors could receive from WFCS or WFAFN for their individual use outside of the Equity Income Strategies at no cost under other circumstances. Similar investment research may be available in the marketplace at no cost or for materially lower fees than are being charged to Allspring in conjunction with the Equity Income Strategies.

WFII's receipt of a research access fee in conjunction with the Equity Income Strategies creates a material conflict of interest since it results in WFII, an affiliate of WFCS, earning more revenue when investors follow a WFCS recommendation to invest in the Equity Income Strategies than WFCS, WFII or their affiliates would earn if investors followed a recommendation from WFCS to invest in any of the other Model Manager strategies available through the Personalized UMA Program as WFCS and its affiliates earn no comparable additional revenue for investments in other Model Manager strategies. WFCS seeks to mitigate this conflict and its associated implications through disclosure, management of the financial incentive for financial advisors to recommend the Equity Income Strategies, and evaluation of the total costs of investing in the Equity Income Strategies relative to other Model Manager strategies. You should carefully consider the research access fee that is retained by WFII and our related conflict of interest when evaluating whether to invest in the Equity Income Strategies.

The Equity Income Strategies are available through the Private Bank channel without the imposition of a separate research access fee. The research access fee is also not applied to assets invested in ERISA accounts.

GMR uses qualitative and quantitative methods to assess investment products to develop due diligence opinions. In general, due diligence opinions entail a thorough assessment of an investment product and the assignment of one of five assessment recommendations: Recommended, Watch, Supported, Sell or Sunset. GMR may change an investment product's assessment recommendation from time to time. GMR due diligence assessments are generally described as: "Recommended", where assessment criteria indicate an investment product is in good standing and GMR has high conviction in it. "Recommended: Watch Level I", where an event has occurred and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases. "Recommended: Watch Level II", where an event has occurred that may have the potential to impact longer term investment prospects and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases. "Watch Level III", where an event has occurred that has elevated concern regarding this product's longer term investment prospects. GMR recommends restricting new flows into the product until our evaluation is complete. "Supported" where a product is in good standing and is considered acceptable to own. "Sell" where assessment criteria indicate an investment product is recommended for exit in the near-term; and "Sunset" where assessment criteria indicate an investment product should be exited over an appropriate period of time as determined by the client's specific situation.

Wells Fargo Investment Institute Global Manager Research (GMR) Ratings

Recommended	Product is in good standing with GMR and the coverage analyst has high conviction in it.
Recommended: Watch – Level I	An event has occurred and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases.
Recommended: Watch – Level II	An event has occurred that may have the potential to impact longer term investment prospects and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases.
Recommended: Watch – Level III	An event has occurred that has elevated concern regarding this strategy's longer term investment prospects. GMR recommends restricting new flows into the strategy until our evaluation is complete.
Sell	Used when the time to exit for clients is desired to be relatively short.
Sunset	Used when GMR believes a relatively longer time period to exit is acceptable.

Supported (ERF)	Product has passed the quantitatively- oriented Eligibility Review Framework (ERF) and is considered acceptable to own.
Supported(ERF): Watch – Level I	An event has occurred and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases.
Supported(ERF): Watch – Level II	An event has occurred that may have the potential to impact longer term investment prospects and is being evaluated. Pending the outcome of the evaluation, GMR maintains its recommendation for new purchases.
Supported(ERF): Watch – Level III	Assigned to Supported products that fail the performance-based ERF review for three consecutive quarters and/or trigger a significant concern from the fundamental ERF review. GMR recommends restriction of new money into these products.
Sell (ERF)	Used when the time to exit for clients is desired to be relatively short. (GMR expects this rating to be seldom used for Supported products but could be used in situations of extremely heightened concern).
Sunset (ERF)	Assigned to Supported products that fail the performance-based ERF review for four consecutive quarters and/or trigger a heightened concern from the fundamental ERF review. Used when GMR believes a relatively longer time period to exit is acceptable.

Please carefully review the Separately Managed Account Disclosure Document for a full description of our services, including fees and expenses. Also, a copy of the Investment Advisor's (Money Manager's) ADV Part II or Disclosure Document is available upon request. Wells Fargo Advisors may use the services of an unaffiliated investment advisor to provide some of the services described in this brochure. Please carefully review these documents before you invest. Past performance is no guarantee of future results.

Investors should make their own decisions based on their specific investment objectives, risk tolerance, and financial circumstances. There is no assurance that the portfolio's objectives will be attained.

The fees for Personalized UMA are assessed quarterly in advance. The fees include Advisory services, performance measurement, transaction costs, custody services, and trading. The fees do not cover the fees and expenses of any underlying packaged products in the portfolio. The fee schedule, which is negotiable, is based on account size and an assumed active equity portfolio. There may be a minimum client fee requirement per calendar quarter to maintain this type of account. Advisory programs are not designed for excessively traded or inactive accounts and are not appropriate for all investors. The minimum account size for this program is \$10,000, however each manager may have their own minimum account size.

Advisory products are not designed for excessively traded or inactive accounts and are not appropriate for all clients. You must have a reasonable basis to believe that the specific program, investment manager or strategy you recommend is appropriate for the particular client based on that client's investment profile, which takes into account, among other things, the client's investment objective(s), investment experience, time horizon, liquidity needs and risk tolerance. You and your client should carefully review the Wells Fargo Advisory Disclosure Document associated with the program for a full description of our services, including fees and expenses and those fees or expenses that may be excluded. The minimum account size for these programs is between \$10,000 and

\$2,000,000 depending on the program or strategy selected. If the program involves mutual funds or exchange-traded funds, your clients should consider that product's investment objective(s), risks, charges and expenses carefully before investing. Prior to recommending and opening advisory program accounts, Financial Advisors must be properly registered in their place of business state.

Wells Fargo & Company ("Wells Fargo") holds a limited ownership interest in Allspring Global Investments ("Allspring"), a trade name used to describe the asset management businesses of Allspring Global Investments Holdings, LLC. Wells Fargo receives compensation from Allspring for the distribution, administrative, research, and operational services that they provide.
